```

## Установка утилит

```
root@db-linux:/home/db#
root@db-linux:/home/db# sudo apt install lxc-utils
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
The following packages were automatically installed and are no longer r
  dbconfig-common dbconfig-mysql icc-profiles-free javascript-common li
  libis-iquery-mousewheel libis-iquery-timepicker libis-iquery-ui libis
```

lxs не установлен

```
root@db-linux:/home/db# lxs storage list
Command 'lxs' not found, did you mean:
  command 'lxc' from snap lxd (5.15-002fa0f)
  command 'lxd' from snap lxd (5.15-002fa0f)
  command 'lxi' from snap lxi-tools (2.5)
  command 'les' from deb atm-tools (1:2.5.1-4build2)
  command 'lxd' from deb lxd-installer (1)
  command 'lrs' from deb lrslib (0.71a-1)
  command 'ls' from deb coreutils (8.32-4.1ubuntu1)
  command 'lxsu' from deb lxqt-sudo (0.17.0-0ubuntu1)
  command 'lxc' from deb lxd-installer (1)
  command 'lxi' from deb lxi-tools (2.1-1)
  command 'lvs' from deb lvm2 (2.03.11-2.1ubuntu4)
See 'snap info <snapname>' for additional versions.
root@db-linux:/home/db#
```

lxc не установлен, устанавливаем:

```
root@db-linux:/home/db# lxc network list
Command 'lxc' not found, but can be installed with:
snap install lxd # version 5.15-002fa0f, or
apt install lxd-installer # version 1
See 'snap info lxd' for additional versions.
root@db-linux:/home/db# snap install lxd
lxd 5.15-002fa0f from Canonical✓ installed
root@db-linux:/home/db#
```

Вывод списков

```

root@db-linux:/home/db# lxc network list
If this is your first time running LXD on this machine, you should also run: lxd init
To start your first container, try: lxc launch ubuntu:22.04
Or for a virtual machine: lxc launch ubuntu:22.04 --vm

```

NAME	TYPE	MANAGED	IPV4	IPV6	DESCRIPTION	USED BY	STATE

        valid_lft forever preferred_lft forever
root@db-linux:/home/db#

```

Создание контейнера:

```

root@db-linux:/home/db# lxc-create -n test123 -t ubuntu

```

Получил ошибку типа:

```

sudo lxc-create -t download -n ubuntu

```

```

lxc-create: No such file or directory - bad template: ubuntu

```

```

lxc-create: bad template: ubuntu

```

Решение:

```
sudo apt-get install lxc-templates
```

В итоге контейнер создался:

```
##  
# The default user is 'ubuntu' with password 'ubuntu'!  
# Use the 'sudo' command to run tasks as root in the container.  
##  
  
root@db-linux:/home/db#
```

Запуск, подключение и проверка памяти

```
root@db-linux:/home/db# lxc-start -n test123  
root@db-linux:/home/db# lxc-attach -n test123  
lxc-attach: test123: attach.c: get_attach_context: 405 Connection refused - Failed to get init pid  
lxc-attach: test123: attach.c: lxc_attach: 1469 Connection refused - Failed to get attach context  
root@db-linux:/home/db# lxc-attach -n test123  
root@test123:/# free -m  
              total        used        free      shared  buff/cache   available  
Mem:           1951          26       1898           0           25        1924  
Swap:              0              0              0  
root@test123:/# _
```

Выход и останов:

```
root@test123:/# exit  
exit  
root@db-linux:/home/db# lxc-stop -n test123  
root@db-linux:/home/db# _
```

Ограничиваем память:

```
root@db-linux:/home/db# mcedit /var/lib/lxc/test123/config
```

```
# Common configuration
lxc.include = /usr/share/lxc/config/ubuntu.common.conf

# Container specific configuration
lxc.rootfs.path = dir:/var/lib/lxc/test123/rootfs
lxc.uts.name = test123
lxc.arch = amd64

# Network configuration
lxc.net.0.type = veth
lxc.net.0.link = lxcbr0
lxc.net.0.flags = up
lxc.net.0.hwaddr = 00:16:3e:4b:b0:09

# Memory limit
lxc.cgroup2.memory.max = 256M
```

Повторный запуск и проверка памяти:

```
root@db-linux:/home/db# lxc-start -n test123
root@db-linux:/home/db# lxc-attach -n test123
root@test123:/# free -m
              total        used        free      shared  buff/cache   available
Mem:           256           26         229           0           0         229
Swap:            0            0            0
```

Автозапуск

```
root@db-linux:/home/db# mcedit /var/lib/lxc/test123/config
```

```
# Memory limit  
lxc.cgroup2.memory.max = 256M  
  
#Autostart  
lxc.start.auto = 1  
lxc.start.delay = 5_
```

Рестарт и подключение к контейнеру без запуска.

Видно, что он уже запущен.

```
root@db-linux:/home/db# Connection to localhost closed by remote host.  
Connection to localhost closed.
```

```
C:\Users\CSTGONTAA>ssh -p 8022 db@localhost
```

```
db@localhost's password:
```

```
Welcome to Ubuntu 22.04 LTS (GNU/Linux 5.19.0-35-generic x86_64)
